

## Illustration workflow

When we reach an agreement regarding timing and cost, I will need 50% of the payment before proceeding with the first step.

### 1. Sketch

I create a raw sketch of the illustration and we discuss the eventual changes to be done in the composition to better fit your project.

This step includes 2 variations. Any further variation costs additional €80 (\$100) each.

### 2. Colors

I test the color palette to highlight the main subject and reach a harmonious look.

This step includes 2 color palette variations. Any further variation costs additional €80 (\$100) each.

### 3. Final FX

If you don't need vector files, I can add some extra lights, shadows and textures that will make the illustration more impactful. The final files will be High-resolution JPEG.

No variations are included in this step. Any change will be quoted separately.

After the final payment of the remaining 50%, I will send you the final high-resolution and/or vector files.
