Illustration Workflow

Hm!
by Mirko Grisendi

1. Sketch
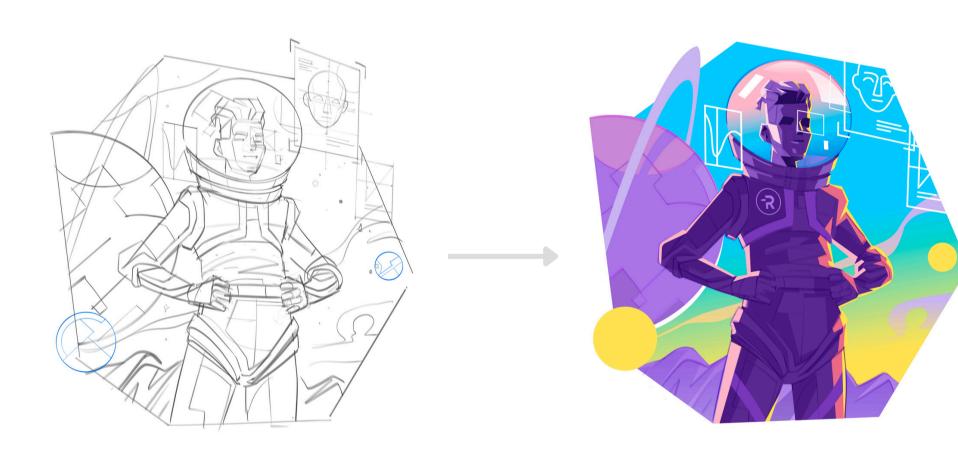

With the initial sketch we understand if we are on the right track and what needs to be modified to align with your idea.

This step includes **2 variations**.

2. Colors

With color tests, we understand which shades best convey the overall atmosphere and draw attention to the focal point.

This step includes **2 color variations**.

3. Final Rendering

With some additional light effects and precise texture choices, the image comes to life and expresses its full potential
The final format is **high-resolution rater image (JPEG PNG, PSD)**.

No variations are included in this step. Any change will be quoted separately.
